Objective

As a skilled UI designer with 2 years of experience, I specialize in blending creativity with usability. My journey has been marked by continuous learning and growth, allowing me to deliver exceptional results. With a deep understanding of user psychology and design principles, I consistently exceed business requirements and user needs. Staying up to date with design trends ensures my work remains innovative and effective in today's dynamic digital landscape. I approach every project with a passion for creating intuitive and engaging user experiences. Diverse projects have contributed to my skill set and expertise, enhancing my meticulous attention to detail and collaborative mindset.

My focus is on crafting interfaces that resonate with target audiences and drive meaningful interactions. Translating client visions into captivating design solutions sets me apart in the industry. Dedicated to continuous learning, I've prioritized staying updated with emerging technologies and design tools. Currently, I'm expanding my skill set by learning Webflow, adding another dimension to my expertise. This commitment to growth ensures I can adapt to the evolving needs of the industry and deliver top-notch solutions.

ProJects

Hospital Management System

I am currently working on the UI design and UX of a Hospital Management System project. This project aims to streamline various administrative tasks within a hospital setting, such as patient registration, appointment scheduling, and medical record management.

Collaborating with Development Team:
Aligning design goals with project vision.

User Research & Feedback:
Gathering insights from healthcare professionals.

Figma Prototyping:
Creating interactive wireframes for iterative improvements.

Consistency & Usability:
Ensuring seamless navigation and data entry.

The project has been ongoing for approximately 4 months, and I am dedicated to delivering a user-centered solution that enhances the efficiency and effectiveness of hospital operations.

Tanuj Punia's Political Website

Tanuj Punia's political website is a vital tool for connecting with constituents and communicating his message effectively. It's a sleek, user-friendly platform designed to showcase Punia's vision and initiatives.

Capturing Punia's Vision:
The website encapsulates Punia's vision through striking visuals and concise messaging. Visitors quickly grasp his core values and priorities.

Interactive Features:
Engagement is key, so the website includes interactive elements like timelines and polls. These encourage visitors to participate actively

Caspian Healthcare

I had the opportunity to design the Caspian Healthcare website, a comprehensive medical platform offering services such as lab tests, doctor consultations, e-commerce for medication purchases, and live chat support. It took approximately 6 months to design and develop this dynamic website, which included both front-end and back-end administration.

Collaborated with the development team:
Worked closely with the development team to ensure the seamless integration of design elements.
Addressed any design-related issues or challenges that arose during the development process.

UI/UX Design:
Took charge of the UI/UX path, ensuring an intuitive and engaging user experience.
Learned some new techniques and methodologies throughout the project.
This project served as a significant learning experience for me, allowing me to enhance my skills and contribute to the creation of a comprehensive healthcare platform.

Branding360.ae

I designed the full website for Branding360.ae, a digital marketing agency. The website features a visually captivating design aimed at enhancing user engagement and conveying the agency's services effectively.

User Research & Feedback:
Gathering insights from healthcare professionals:

Applied creative UI design techniques:
Conducted extensive user research to understand the target audience and their preferences.

Ensured consistency and usability across all pages:
Emphasizing the agency's brand identity and services.

Jeweler Website

I had the opportunity to lead the design of a full-fledged e-commerce website for a prestigiousjeweler's brand. As the sole UI/UX designer on the project, I was responsible for shaping the entire user experience journey, from initial concept to final implementation.

Worked closely with the web development team to ensure seamless integration of design elements:
Conducted regular meetings and discussions to align design goals with development requirements.
Provided detailed design specifications and assets to facilitate implementation.

Conducted user testing and gathered feedback to iteratively improve the user interface.
Incorporated best practices in user-centered design to enhance usability and accessibility.
